INTRODUCTION

SCOPE AND COVERAGE

The statistics contained in this bulletin have been compiled from reports of Workmen's Compensation claims closed during the year ended 30th June 1966 and of unclosed claims of three years' duration at 30th June 1966 submitted by Insurance Companies, self-insurers, and State Government Departments, through the South Australian Department of Labour and Industry. Each original claim has been regarded as a separate accident. Reports have been received of re-opened claims but no details of these have been included in the Tabulations.

Only persons within the coverage of the South Australian Workmen's Compensation Act are included. Notable exclusions are self-employed persons and all Commonwealth Government officers and employees. Thus persons employed within some industry classifications (e.g. Defence Services and Communications) are not covered at all while coverage is reduced in other industries, particularly in retail trade and rural industries.

In tables where figures have been rounded, discrepancies between totals and sums of components are due to rounding.

All values in this issue are expressed in decimal currency (\$2 = £1).

DEFINITIONS

INDUSTRIAL ACCIDENT: For the purpose of this collection the following definition has been applied: "An Industrial Accident is a compensated work injury causing death or absence of the injured person from work for one week or more, excluding journey cases, cases occurring during a recess period, and disease cases." "One week" has been interpreted as "one week of seven calendar days or five working days".

INDUSTRY: The 1961 Census Classification of Industries has been used.

ACCIDENT FACTOR: In general, an accident factor may be regarded as "That underlying agency, other than human failing, which appears to contribute most materially to an accident and which would be most likely to receive attention in preventing the occurrence of a similar accident".

A detailed list of "Accident Factors" is given in Table 9 to which reference should be made for clarification of the group titles used in Tables 2, 5, 6, and 8.

GENERAL COMMENT

This bulletin is the fifth published by this Bureau on Industrial Accidents in South Australia and covers the year ended 30th June 1966. Statistics contained in this bulletin relate to claims closed, or regarded statistically as closed, during the year ended 30th June 1966. Fluctuations in the flow of processing and reporting of claims can significantly affect the figures for any given year.

The attached tables provide an analysis of 23 fatal accidents, and of 10,522 non-fatal accidents each of which resulted in absence from work of a week or more; as against 17 fatal accidents and 11,809 non-fatal accidents in 1964-65. Those accidents resulted in compensation payments totalling approximately \$2,378,000. Other returns received from insurance companies, self-insurers and State Government departments show that during the year ended 30th June 1966 they received approximately 58,350 effective claims and that compensation totalling approximately \$4,725,000 was paid. These figures indicate that the statistics compiled on the basis described in this introduction cover 18% of total compensated accidents and that associated compensation payments represent 50% of total compensation payments for 1965-66.

More detailed tabulations for some of the tables are held in this office and information contained therein may be made available on application to this Bureau or to the South Australian Department of Labour and Industry.
